## TOWARDS ABS REGULATORY FRAMEWORKS THAT ARE RESPONSIVE TO SECTORAL NEEDS

### Some Strategic Options

#### Sector responsive ABS frameworks

What normally happens when ABS regulations are developed

Uniform, centralized, rigid approach for all sectors

**ABS** regulations

Flexible, iterative approach

What is needed for ABS to be sector responsive

Integrating ABS into existing sectoral laws and policies

Decentralized approach focusing on departmental priorities and coordination

# ABS regulation as a sector responsive financing mechanism for biodiversity conservation

Valorization of GR by stimulating bioprospection through sector specific and facilitative regulations

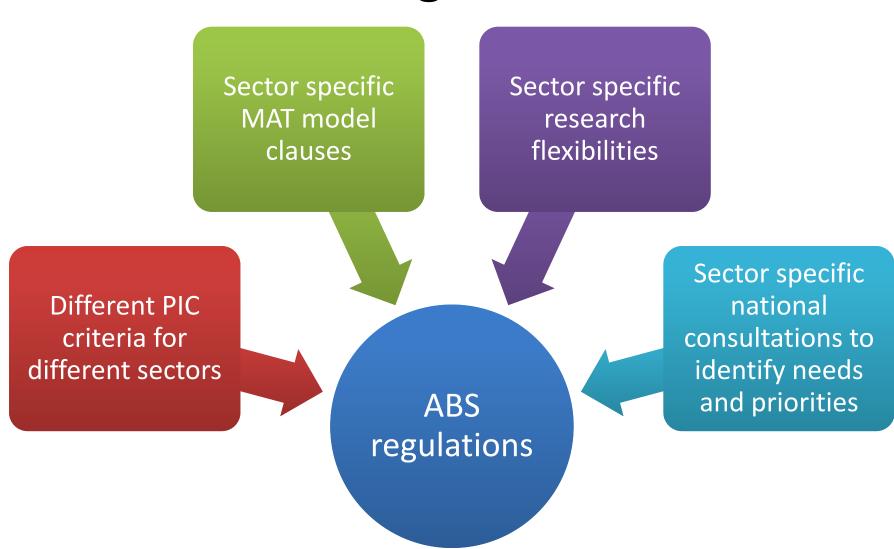

Leaving utilization open based on sector needs and negotiating benefit sharing at time of first invention

Sector responsive

Supporting sector specific national research, technology transfer, livelihood generation

National institutions offer GR and IP to various sectors in the world market

# Approaches to sector adaptability in ABS regulations

### Simplicity, effectiveness and costefficiency

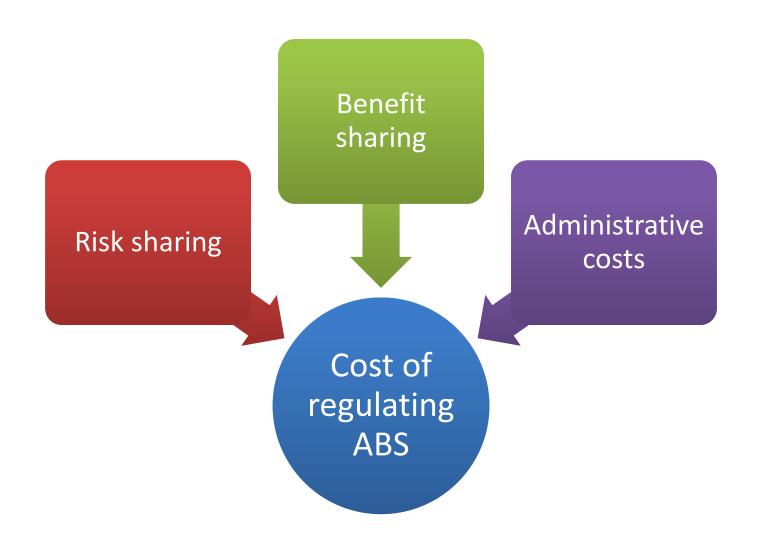

Multiplicity of ownership, control over PIC and benefits while outsourcing administrative burdens

# Common pooling research capabilities

#### Resource mobilization

## Thank you
