MAKING OUR COFFEE

MORE ORGANIC!

Factory Location Akaki Kaliti Sub city kebele 09 and 10
Phone: +251 91120 1992, Sales +251 114340311, Fax: +251 114340338
E-mail: gseventiplc@yahoo.com, Webpage WWW.gseventiplc.com
www.g7tradingandindustry.com, P. O. Box. 965, Addis Ababa, Ethiopia

Statement of the problem

Challenge were occurred in our product market; the green minded customers, the European Union and the Japanese stopped buying our coffee because of the following reason

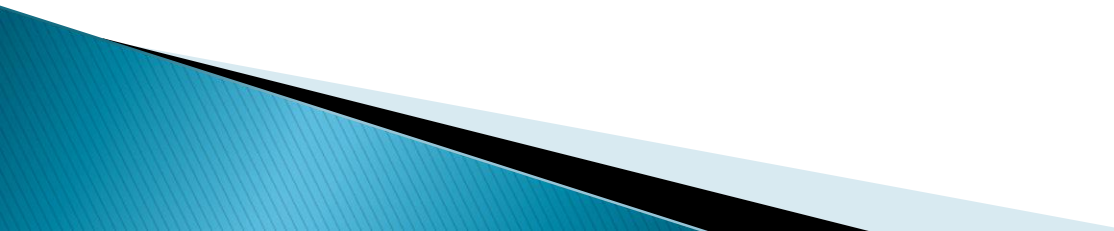

- High level of unsaponifiable matters
- Due to high mineral residue of batching oil
- In adequate quality of raw material

To solve these problems, the company proposes and established Research & Development Department .

Mission

- ▶ To become a center of excellence in 100% organic Fiber products development by designing production methodologies focusing on the national & international quality standards
- ▶ To facilitate the improvement of structural conditions in the jute sector through improvement of productivity and quality, and promotion of the application of new processes and technologies

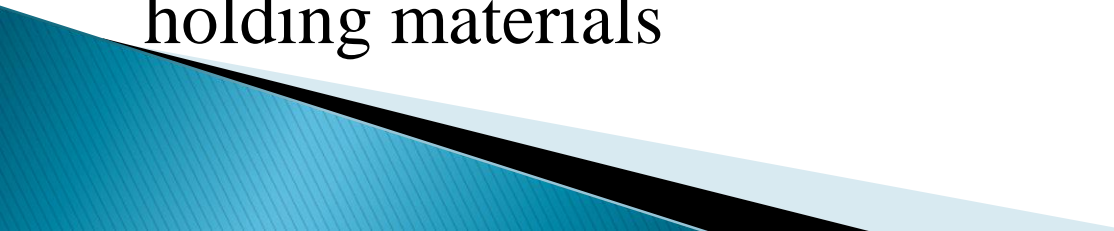

Vision

- ▶ To be the center of excellence in the manufacturing of 100% organic fiber products that meets national & International quality standards
- 

Objective

To produce 100 % organic products

Specific objective

- To make our production process eco-friendly
 - To remove anti bacteria property of jute bags
 - To impart soft and smooth of jute bags
 - To ride of mineral residue from jute bags
 - To make use of Ethiopian natural resources for its sustainable development
 - To minimize the import and maximize the export
 - To save foreign currency
 - To produce organic jute bags for all kinds of food grade holding materials
- 

JBO(jute batching oil) Liberating substances are non-biodegradable products, because of their hazardous effects

- ▶ on environment and
- ▶ human health, re-established the needs of natural fibres to our society in terms of packaging food grade items by doing projects on:
 - RBO(Rice Bran Oil)
 - Vegetable oil &
 - *Aloe debrana* to substitute imported mineral oils of JBO(Jute Batching Oil)

The Need of *Aloe debrana* Gel Research

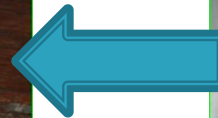

- ▶ Ethiopia has a great wealth of natural resources (*Aloe debrana*) to meet the world bio products requirements.
- ▶ There is a no single *Aloe debrana* products manufacturer in the country,
- ▶ But now G-Seven Trading and Industries P.L.C is conducted a research work on *Aloe debrana* and revealed can be used for jute fiber softening material. Due to
 - ❖ High level of gel content
 - ❖ The farmers easily grow with short period of time
 - ❖ The costs are inexpensive

Cont...

Then the company creates an agreement to Ethiopian Biodiversity Institute and sent results of research work on **Aloe** to:

- AAU (Addis Ababa University)&
- Germany to test the residue of oil
- ▶ After doing this, the company holds the patent right or utility model for “*Aloe debrana* gel invention for emulsion” from Ethiopian intellectual property office

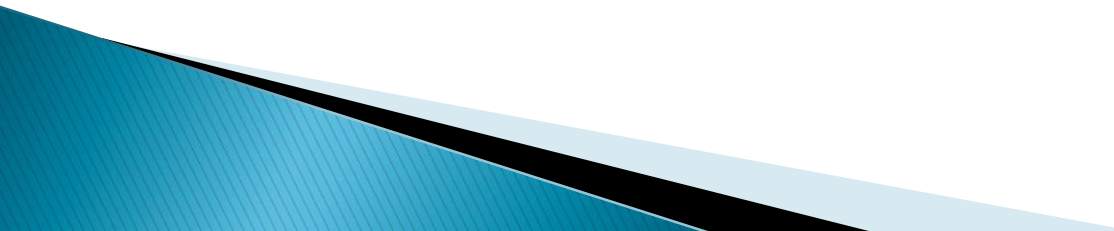

Mass Production / Implementation

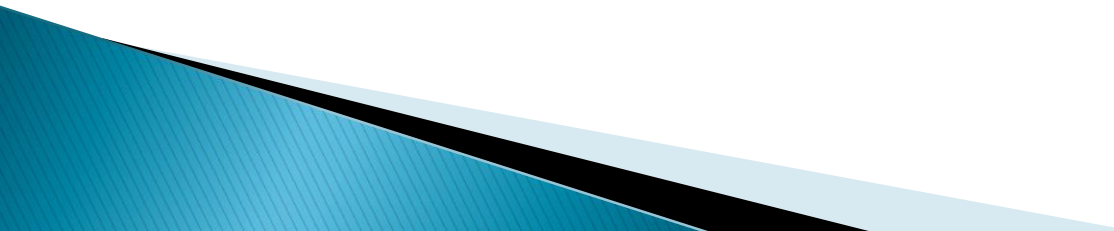

Beneficiaries

- ▶ Ethiopian farmer that produces *Aloe debrana*
- ▶ G-Seven Trading & industry PLC
- ▶ Ethiopian Textile factories
- ▶ Ethiopian Food grade exporter & importers business groups

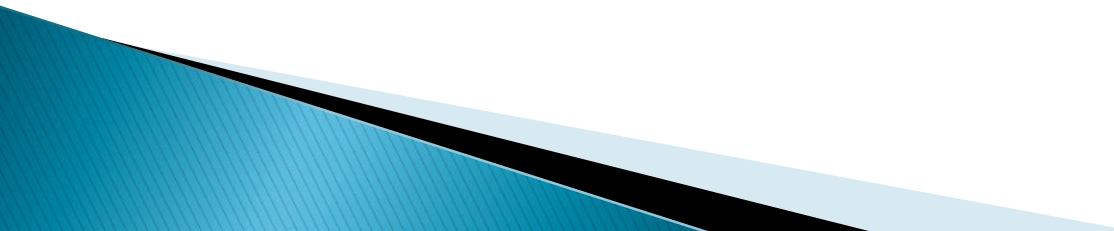

Environmental Impact Assessment

- ▶ All jute fibers & *Aloe debrana* are eco-friendly
 - ▶ Jute plants & **Aloe** plants will protect the soil from erosion, have great role in soil conservation & sequestrates CO₂ from the environment
- 

Output of Research

- ▶ Makes use of Ethiopian natural resources for its sustainable development
 - ▶ The company produces 100% organic packaging material
 - ▶ Due to Import substitution, the company saves foreign currency
 - ▶ Creates job opportunities
 - ▶ Support to establish small scale industries
- 

Conclusion

- ❑ For sustained growth of the Jute sector and eco-compliance of jute products, *Aloe debrana* is used for further development and intervention of such eco-friendly technologies would be the obvious choice.
 - ❑ The company is ensuring that the use of *Aloe debrana* leaf are sustainable for the local economy
- 

“Indeed, G-7 T & I P.L.C
makes a good relationships
& best friends of
development.”

THANK YOU
