

GIZ supports you to manage your value chains in a **sustainable** and **ABS compliant** way

GIZ as a single service provider for all stages in the process

Legal Framework

- Facilitate dialogue between all relevant stakeholders to **inform the development of ABS legislative** and regulatory frameworks
- Advice on legal requirements
- Support establishment of **ABS agreements** (including support for indigenous & local communities)

Research & Development

- If legal basis is given: **Identification of local partners** for research & development partnerships
- **Build capacities** with indigenous and local communities
- Integration of ABS requirements into **business practices**
- **Ensure compliance** to technical standards

(Agricultural) Production

- **Value chain assessment** & enhancement of **sustainable management** of the respective resource in accordance with environmental and social standards
- **Organizational capacity development** with small producers (including benefit sharing agreements)

Marketing

- Regular **monitoring and evaluation**
- Establishment of **traceability system**
- **Integrated reporting:** communication on adherence to standards and due diligence

We use a sound, experience-based methodology in project management and cooperation situations where different parties' interests and objectives need to be met.
